More IBD Medical Education

Expand upon what you learned at the Crohn's & Colitis Congress™ by attending Digestive Disease Week® (DDW), June 2-5, 2018, in Washington, D.C. Learn the new and most novel advancements in IBD research with a variety of scientific sessions — Research Forums, Clinical Symposia and Plenary Sessions — all dedicated to the hottest topics in IBD care and research. DDW is co-sponsored by AGA.

All IBD-related sessions and posters will be tagged to the Inflammatory Bowel Diseases track. DDW Tracks help you navigate through education relevant to you and can be used to filter in attendee planning resources, including the DDW Mobile App and *DDW Daily News* Program Section.

Learn more about the meeting and register at www.ddw.org/registration. DDW On Demand, an online-only library including 400 hours of non-ticketed presentations from DDW 2018, is included with registration.

Scope Out the Exhibit Hall

Are you looking for innovative products and services? Visit the Exhibit Hall to see the world of GI companies in one place who supply products or services for all of your needs.

More than 285 companies will be present to show you new product technologies or enhancements. Specialty areas such as the New Exhibitor Pavilion and Foundation Row highlight first-time companies and nonprofits.
